

VA Enterprise Cloud Security and Monitoring

VAEC VISTA

- All monitoring is via non-invasive, real-time mirroring of all RPC traffic between VISTA and its Clients.
- All VISTA systems, and all its end-user Clients remain unchanged allowing safe, rapid enterprise-wide production deployment in the VA Enterprise Cloud (VAEC)
- All Veteran data access and transactions are comprehensively audited, monitored and secured for all users, clients, and applications in real-time via Cloud-based monitoring and security (RPC monitoring).

VAEC: VA Enterprise Cloud (U.S. FedRAMP-HIGH)
VISTA: Veteran Health Information Systems Technology Architecture
RPC: Remote Procedure Call (MUMPS)
RPC Clients: CPRS, JLV, CAPRI (and 45 others)
VAM: VISTA Adaptive Maintenance
AWS: Amazon Web Services
VPC: Virtual Private Cloud

Contract:
VA: T4NG-0411
VISTA Adaptive Maintenance
VA Enterprise Cloud Security
TAC: 19-54164

Certification:
U.S. GovCloud: FedRAMP-HIGH
VA: RiskVision (425 controls)
DoD: eMASS (1600+ controls)
NIST: FISMA-HIGH
Commercial: HIPAA

Deployment:
ATO: 2020-01
IOC: 2020-03
